

## ESET Mobile Security

*Comprehensive Protection, Maximum Functionality,  
Minimum System Load in One Security Solution!*

### In Command of Your Security

For over 20 years ESET has been at the forefront of the fight against computer threats and is trusted by over 100 million users worldwide.

ESET is the holder of the highest number of "VB100" awards by Virus Bulletin since testing began in 1998.

<sup>1</sup> available for Android OS

<sup>2</sup> available for Windows Mobile and Symbian OS

## ANTI-THEFT FEATURES

<b>Remote Wipe</b>	Use SMS command to safely delete all your contacts, messages and even removable memory cards. Advanced cleaning procedure ensures that it will not be possible to restore any wiped data.
<b>GPS Localisation<sup>1</sup></b>	Remotely locate your phone using a remote SMS command and track the phone's GPS coordinates.
<b>SIM Matching</b>	Stay in control of your phone remotely. If unauthorised SIM card is inserted into your device, you can still command the phone remotely. A trusted Friend is informed of the inserted SIM's phone number, IMSI and device's IMEI.
<b>Trusted Friend</b>	Trusted Friend is your help in the event of mobile phone's loss or theft. Initially, you set up one or more Trusted Friend phone numbers to be able to turn to in time of need.
<b>Call Blocking<sup>1</sup></b>	Shut out calls from unknown or hidden numbers. Simply block unwanted incoming/outgoing calls. Your children will only talk to people you trust and you will prevent calls to toll numbers.
<b>Uninstall Protection<sup>1</sup></b>	One password controls it all. Only authorised persons will be able to uninstall your ESET Mobile Security (Android 2.2 and higher).

## SECURITY FEATURES

<b>SMS/MMS Antispam</b>	Receive only the SMS/MMS you want, blocking the rest. Define your own trustworthy contacts via blacklist/whitelist or simply block all unknown numbers.
<b>Real-time Protection</b>	The heuristics, based on the revolutionary ESET NOD32 proactive technology, is optimised for mobile platforms to provide real-time protection against emerging mobile threats and exploits.
<b>Security Audit</b>	Run an on-demand security audit to check the status of all phone functions: battery level, Bluetooth, device visibility, disk space, network and running processes.
<b>On-Access Scanning</b>	Advanced scanning protects your phone by scanning all application packages and files incoming via any type of connection – Bluetooth, Wi-Fi or Infrared.
<b>On-Demand Scanning</b>	On-Demand Scanning provides reliable scanning and cleaning of integrated memory and exchangeable media. Specific folder scanning is also included.
<b>Firewall<sup>2</sup></b>	Monitor all incoming and outgoing communication based on your defined custom rules. If you wish, you can automatically block data while in roaming to keep your phone bill under control.
<b>Logs &amp; Statistics</b>	Get comprehensive overview and helpful information to stay up-to-date on your smartphone's security.

**System Requirements:** Android 2.0 and higher, experimental support Android Honeycomb (3.0 and higher), Windows Mobile 5.0; 6.0; 6.1; 6.5, Symbian S60 3<sup>rd</sup> Edition, Feature Pack 1 or 2; 5<sup>th</sup> Edition; Symbian^3 (Nokia only)
